

Bandari Vamshi

Full Stack Developer — Backend Engineer — Node.js — React.js — Java — DSA

Hyderabad, India | 6302798060 | bandarivamshi07@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Full Stack Engineer building high-performance production systems with MERN stack. 3+ shipped applications serving real users, 150+ DSA problems solved, expert-level proficiency in system design, database optimization (75% performance gains), and secure API architecture. Looking for Backend or Full Stack roles where I can own features end-to-end.

Technical Skills

Languages: JavaScript (ES6+), Java, SQL

Frontend: React.js, React Hooks (useCallback, useMemo), Tailwind CSS, Performance Optimization

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Error Handling

Databases: MongoDB (indexing, aggregation, transactions), MySQL, Query Optimization

DevOps & Testing: Docker, Git, Jest (unit tests), Postman, Vercel, Render, GitHub

Core CS: Data Structures, Algorithms, OOP, DBMS, OS, CN

Projects

E-Commerce Platform — React.js, Node.js, Express.js, MongoDB

[Live](#)

- Engineered full-stack e-commerce with 15+ REST endpoints for product catalog, authentication, cart management, inventory, and order processing
- Implemented JWT-based authentication with role-based access control (Admin/User) using bcrypt and custom middleware for endpoint security
- Optimized MongoDB schema with strategic indexing and query optimization, reducing API response time by 75% (800ms → 200ms)
- Built 10+ reusable React components for product filtering, sorting, real-time cart updates using React Hooks (useState, useEffect)

Wanderlust – Property Rental Platform — Node.js, Express.js, MongoDB

[Live](#)

- Developed scalable backend with 10+ REST endpoints for property listings, bookings, reviews, and complex business logic
- Engineered transaction-safe reservation system preventing double-booking race conditions using MongoDB atomic operations and ACID principles
- Designed normalized MongoDB schemas with proper indexing, integrated Cloudinary for image storage and Mapbox for geolocation
- Deployed on Render with environment configuration, database connections, and production-ready error handling

Zerodha Clone – Trading Dashboard — React.js, REST APIs

[Live](#)

- Built interactive trading dashboard with real-time market data visualization using React Hooks and efficient state management
- Designed 12+ reusable React components (charts, forms, tables, navigation) following component architecture best practices
- Optimized rendering by reducing unnecessary re-renders by 40% using React.memo, useMemo, and useCallback
- Integrated backend REST APIs for simulated trading with consistent data contracts, centralized error handling, and proper HTTP status codes

Education

SVS Group of Institutions

2021 – 2025

B.Tech in Computer Science and Engineering

CGPA: 6.85

Sri Vedha Junior College

2019 – 2021

Intermediate (MPC)

Certifications & Achievements

- Designed and deployed **3+ full-stack applications** with secure authentication, scalable REST architecture, and optimized database workflows.
- Solved **150+ Data Structures and Algorithms problems** on LeetCode covering arrays, strings, linked lists, trees, graphs, and dynamic programming. [LeetCode Profile](#)
- Full Stack Development Certification** – Apna College (MERN Stack Mastery) [Certificate](#)
- Java Programming Certification** – HackerRank (Core Java & OOP Fundamentals) [Certificate](#)
